

Organosilicone Penetrating Surfactant

A non ionic wetter, spreader & penetrant for use with agricultural pesticides.

Spalding Penetrant[®] is not a general purpose wetter. Spalding Penetrant[®] is a specialty product used to enhance spray mixes where a highly penetrating surfactant is required.

Spalding Penetrant[®] is a non-ionic wetter, surfactant & penetrant for use with Glyphosate and certain Brushweed Herbicides to improve coverage, penetration and uptake on brush, woody weeds and ryegrass. The product can also be used with fungicides, insecticides, miticides and foliar micro-nutrients as per the directions of use table. Spalding Penetrant[®] is a highly penetrating surfactant. It improves efficiency by enhancing the penetration and uptake into certain hard to control woody weeds such as bracken, gorse and perennial ryegrass. Consume[™] is not a general purpose surfactant and should only be used where addition of a silicone surfactant is recommended.

Spalding Penetrant[®] should be used with Glyphosate Herbicides when spraying Bracken, Broom, Sweet briar, Perennial Ryegrass & Gorse. It should also be used when spraying weeds such as Blackberry & Eucalypti. Spalding Penetrant[®] improves efficacy by enhancing the coverage, penetration and uptake of some herbicides in hard to kill weeds or difficult to wet brush and woody weeds. It may reduce the rain fast period to 30-60 minutes when sprayed on dry foliage.

Further details of use can be found in the Directions for Use table supplied with product or available upon request.

Active Ingredient: 1020g/L Polyether Modified Polysiloxane.

Similar or Equivalent: Pulse[™] (Nufarm Australia) & Consume[®] (BD Chemicals).

Pack Sizes: 1L, 5L & 20L

Manufacturer: Spalding Holding Pty Ltd

APVMA Number: 62811
